Portfolio

You can find my portfolio website (also built from the ground up by me) on Render at this URL: https://portfolio-2j31.onrender.com

Please note that the Render hosting is on a free tier, so the site may take a moment to spin up when you first access it. I appreciate your patience!

Skills

Programming

- JavaScript (ES6+) / TypeScript / HTML5 / CSS3
- NodeJS / Express / React / MongoDB (MERN stack) + Vite
- MySQL / Postgres
- Python, including:
  - Quart / Flask
  - Psycopg
  - Luigi
  - Maya API
- AngularJS 1.5
- GameMaker Language
- PHP
- Godot
- C++
- C
- Java

Design

- Adobe Photoshop CC and below
- Adobe After Effects CC and below

Software/OS familiarity

- Hypercorn
- WAMP stack
- Git, Unity VCS
- VSCode & Eclipse IDEs
- VoIP / Chat software (Microsoft Teams, Slack, GoToMeeting, Skype, etc.)
- Windows 11 and earlier / MacOS / Linux (Ubuntu)
- Jenkins
- GameMaker Studio 2 and below

- Godot

Concept Design / Game Design
Writing Proficiency (both creative and technical)
Communication of Ideas
Interpersonal Skills
Typing/Data Entry

Experience

Steamroller Animation (2023-present)

- Lead developer on internal web apps
  - Gathered functional requirements from our department heads to write up a detailed proposal
  - Designed and implemented Quart server for API with a Vite+React front-end
  - Integrated API with third-party data source APIs to aggregate company data into one UI
  - Designed and architected a database and corresponding sync system to consolidate and sync all data from third-party sources into a single source of truth Postgres DB automatically
    - DB maintenance and remote procedures were implemented by our DBA, sync module framework and modules were implemented by me
  - Designed and implemented a separate Quart server for SSO/SAML authentication for the web apps and all future pipeline development tools and apps
    - Integrated with Google SSO, plus signed JWT token verification wrappers and token auto-renewal
- Python tool developer
  - Implemented several Python plugins and tools for integration with Maya and Plastic VCS
  - Designed and implemented a Quart server to allow remote processing, monitoring, and management of jobs submitted through the tools
  - Performed code auditing during a transition from Plastic VCS to Git to determine dependency trees and unused code to be pruned
- Technical support
  - Regularly worked with employees across the company to debug and solve software issues
  - Both from our team's apps and tools, as well as third-party apps such as Unreal, Maya, Plastic VCS, Autodesk RV, and more
- Out tools were used by animators on major projects such as Fortnite, Horizon: Hunters Gathering, Overwatch, Avatar: Fire and Ash, and more.

Fiserv Solutions LLC (2018-2022)

- Senior Web app developer for Solution Builder & Optis Service fintech customer service platform
  - Built features and debugged legacy code in AngularJS 1.5 to build the UI of a multi-tenant RESTful application for multiple major financial and retail clients
  - Converted AngularJS codebase to a modern React framework
  - Prototyped a NodeJS version of the RESTful services (formerly in Java) using modular Express routers and Node worker threads for scalability
  - Helped teach other teams how to improve their development process, from unit testing to better PR review and more efficient scrum master organization

Contact Information:
Evan Sailer, team lead on Solution Builder / Optis Service project
(480) 255-2378

Trilogy Education Services, Inc. (2017)

- Teaching Assistant for University of Central Florida's continuing education "Coding Bootcamp"
  - Instruct students on web design fundamentals, from HTML/CSS and beyond, focusing on Javascript and NodeJS plus React (MERN stack)
  - Substitute for the instructor when absent.
  - Tutor students in the nationwide bootcamp program via Google Hangouts.

Contact Information:
Chavon Rodriguez: (954) 770-3854

Snider's Formal Wear (2013-2015)

- Lead developer for internal systems
- Designed and developed from scratch:
  - Inventory systems
  - Customer management systems
  - Billing and invoice systems
  - Customer order ticketing
  - Invoice, ticket, and inventory search systems
  - Accounting system
- Used HTML5, CSS3, Javascript (with jQuery), PHP, and SQL (on a MySQL platform)
- Worked closely with database administrator to guide integration of database with front-end and server-side processing
- Set up initial installation of all systems and used version control (Git) to keep the customer up-to-date after that
- Converted all data from current systems to facilitate transition

Code sample available upon request.
